## Description & Area of Application

- Anti-tip kit for furniture with bracket, screws and plugs
- For shelves, cabinets, dressers, tables, and more

## Processing & Installation

- Drill a hole the size of the plug diameter
- Drill into perforated brick and gypsum plasterboard without impact in a rotary motion so that the webs in the perforated brick are not broken
- When drilling into gypsum plasterboards, use a wood or metal drill bit
- Use impact drilling into concrete and solid brick
- Minimum screw length = plug length + fixture thickness + 5 mm
- Pre-positioned installation
